## Our Purpose

A lifetime commitment to end-to-end holistic plumbing solutions through the design, development and delivery of quality assured, sustainable practices for our clients.

Positively impacting large scale infrastructure and urban development in Australia.

Celebrating diversity & long standing professional relationships.

Consistency in pricing, service & quality, no matter what the economic client

## Our Corporate Social Responsibility

For over 15 years On Time Plumbing Australia works within the Business for Business environment with client fulfilment as its primary focus. Our team of qualified plumbers and engineers ensure that plumbing project development and civil works are presented to our clients as the beneficiaries of our knowledge and expertise. Through cost effective construction, budgeting and estimation, On Time Plumbing Australia guarantees clients experience quality of service including material and resource rationalisation, coordination and provision.

Our Return on Purpose as an organisation is fulfilled when our team of employees maintain the desire to professionally grow, learn more, and further develop their talents. At On Time Plumbing Australia we celebrate diversity and professional working relationships amongst passionate individuals and collaborators while celebrating their work life balance. Our team work within a professional and highly motivated organisation, where the development of skills and careers are nurtured within a positive workplace environment.

Innovation and the exploration for continual technological advancement towards project design and development methodology plays a pivotal role in On Time Plumbing Australia's culture. Plumbing Planification is a key component, as we seek visibility of current, as well as alternative plumbing solutions that challenge and improve civil works practices for clients. Through the undertaking of medium to large and complex projects, the team of qualified plumbers and engineers guarantee quality assurance and operations, accountability on time and within budget. We ensure client fulfilment with complete handover from design to completion of construction including hydraulic, stormwater, wet-fire pipe systems and civil projects.

## Our Specialties

We deliver quality construction plumbing within the plumbing environment for both public and private sectors. With a long standing track record, we provide end-to-end holistic plumbing solutions through design, development, and delivery for hydraulic services within the commercial building and industrial sectors.

Working through our Sydney based office, the culture of On Time Plumbing Australia is founded on integrity and professional conduct to enable safe, sustainable and quality construction works.

Our team of quality licenced plumbers combine local presence and knowledge with an absolute focus on service to client service to client project requirements and cost analysis

with an aspiration to further expand operations to construction projects that impact large scale infrastructure and urban development. On Time Plumbing Australia undertakes a large amount of design consultation and co-ordination between trades to achieve effective and timely results.

## Servicing

### Residential

On Time Plumbing Australia is an Australian organisation with a lifetime value commitment to family. Residential services is a division driven by honesty and integrity, ensuring that communities live within urban and sustainable development aligned with value management and contemporary construction methodology including gas, fire and sprinkler systems

### Commercial

On Time Plumbing Australia expand operations in extended maintenance programs for construction projects from the inception of concept development through to project delivery. Our consultancy services encompass water installation and reticulation services including sanitisation, pressure testing and commissioning are key components of the services supporting the commercial client and community.

### Industrial

Large scale industrial and civil works including hydraulic services, stormwater systems, pipe installation and culvert works within Sydney. On Time Plumbing Australia supports the development of Australia's infrastructure particularly in the civil and maintenance works for water and wastewater pumping stations including liquid and waste management, ensuring sustainable approaches to the industry. We deliver comprehensive construction budgeting and estimation analysis promoting project transparency and development.

- o Hydraulic Design
- o Civil Works
- o Excavations
- o Stormwater Design
- o Sprinkler Systems
- o Pump Installation
- o Wet-Fire Design
- o Water Plumbing
- o Filtration Systems

# On Time Strategic Framework

On Time Plumbing Australia achieve client fulfilment by employing a design thinking framework to ensure flow throughout all stages of project development. Using our checklist you can come to understand how we move through key indicators to facilitate the communication channels for all personnel involved.

The initial consultation is where professional networks align with like-minded and solution-focussed clients. During this infancy stage of project development we share our unique cultural identity and how On Time Plumbing Australia unify installation methods on all projects due to our vast industry experience and data-set within a wide range of building applications.

Our cost saving and commissioning strategies are established through the implementation of a Zero Defect Policy and high quality control standards, as we believe in planning before execution.

Quality meets competitive prices for our clients, as we minimise variations through the detailed design of layout stack allocation, hydraulic troubleshooting, suspension systems, as well as risk management procedures to manage job sites.
